

Tallahassee Ear, Nose and Throat and Audiology Associates are pleased to provide you information on how the installation of an “induction loop” or “hearing loop” can further improve speech understanding for those who wear hearing aids or cochlear implants.

As part of our community outreach, Audiology Associates is participating in a national educational campaign to increase awareness about assistive listening technologies. The project is a collaborative public awareness campaign developed by the Hearing Loss Association of America (HLAA) and the American Academy of Audiology.

To experience the improved hearing offered by the “loop” you must turn your hearing aids to the T-coil setting. If you are unsure if your hearing aid has this feature or how to activate it, please inquire during your appointment. Informational brochures are also available in our waiting room.

Locations in Tallahassee where a hearing loop is available:

- Tallahassee Senior Center, main auditorium
- Theatre Tallahassee, formerly The Tallahassee Little Theatre
- The Maguire Center at Westminster Oaks
- First Presbyterian Church
- Trinity United Methodist Church
- Thomasville Road Baptist Church
- Bradfordville First Baptist Church

We encourage you to join our efforts to bring this technology to other venues in our area.

Contact Melissa at 850-219-2601 for further information.
